Acceptance Critria

ITEM

As a patient I want to be able to register my account with my personal details so that my doctor is able to see my health information

Criterion 1:

Given that I am on the registration form

And I provide a valid name, email and password

When I click 'register'

Then I am directed to the patient dashboard

And my account is created in the database

Criterion 2:

Given that the user is on the register form

And not all the required fields have been filled in correctly

When the 'register' button is clicked

Then an error message will be displayed

And the incorrect fields will have their borders highlighted

Criterion 3:

Given that I do have an account

And I have used an incorrect password

When I click 'sign in'

Then I am not able to access the account

And I am given a notification indicating my error

And the password field is highlighted

As a patient, I want to be able to sign into my account to be able to utilise the app, while my personal details are kept secure in my account

Criterion 1:

Given that I have an account

And I use the correct email and password

When I click 'sign in'

Then I am taken to my account dashboard

And I can utilise the app as a patient

Criterion 2:

Given that I do not have an account

When I click 'sign in'

Then I am not able to access the app

And I am given a notification indicating my error

Criterion 2:

Given I am modifying my account

And I make a change that is invalid (e.g. not alphabetical name)

When I click 'save changes'

Then I am notified of my error

And the affected fields are highlighted

And the account is not updated in the database

As a patient, I want to be able to modify details of my account (e.g. name, address) so that my doctor has access to the most up-to-date information about me

Criterion 1:

Given I am modifying my account

And I enter valid changes (e.g. alphabetical name)

When I click 'save changes'

Then I am notified that the account is updated
